ABOUT US

A Short Overview of the Metgain Ecosystem

Metgain blockchain ecosystem with the help of the Inter-Blockchain Communication protocol (IBC) launched in January 2023, these chains can connect, transact and exchange tokens and data seamlessly. metgain is growing a business that provides existing and prospective customers with access to an Innovation.

INTRODUCTION

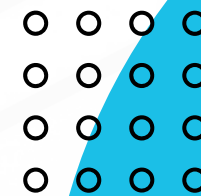

As a blockchain system, we are committed to providing our clients with exceptional service and experiences. In order to achieve this, we are always exploring new technologies and innovations that can help us improve our operations and better serve our customers.

One area where we see significant potential is blockchain technology. By leveraging the power of blockchain, we believe we can create a more secure, efficient, and transparent travel experience for our clients.

For example, we are exploring the use of blockchain for payment processing. With its decentralized and secure nature, blockchain can help prevent fraud and provide a more seamless payment experience for travelers. We are also looking into how blockchain can be used to create immutable records of transactions, making it easier to track and manage inventory and bookings.

In addition, we see great potential in the use of smart contracts. By automating various aspects of the travel industry, such as booking, check-in, and loyalty rewards, we can help save time and reduce costs for both travelers and travel companies.

At our core, we are a system that is committed to innovation and excellence. By embracing emerging technologies like blockchain, we believe we can continue to provide our clients with the exceptional service and experiences they deserve.

PEOPLE FEEDBACK

MONTHLY TRAVELLING AUDIENCE

ETHAN SANCHEZ

I am a regular traveler, I frequently travel to different countries I always have to pay extra fees for currency exchange also sometimes I have to pay extra charges to foreign exchange firms to avoid fraud so I end up paying extra charges...

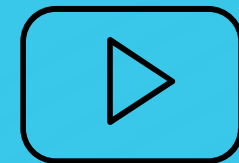

NOAH

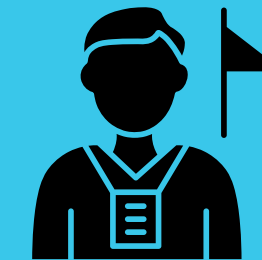

Hello, every time when we go on vacation to foreign countries I have to go through a lot many documents because currency exchange is one of the biggest problems. after watching daily scammers over new channels I am afraid to move to foreign countries.

METTRIP

CUSTOM TOKEN WALLET

We are excited to introduce our new crypto travel app, meTrip , which is designed to make travel booking and payments faster, more secure, and more convenient than ever before.

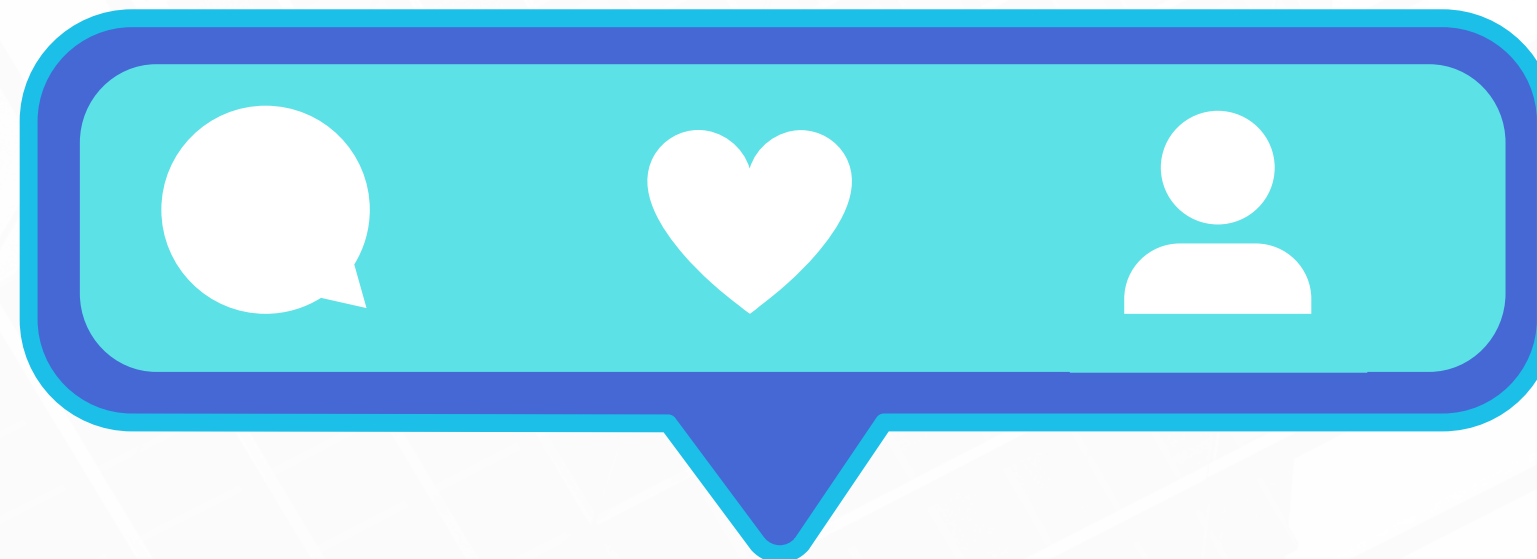

Our app utilizes blockchain technology to provide secure and transparent payment processing, allowing you to pay for your travel arrangements with ease and confidence. You can also earn rewards in the form of cryptocurrency for booking through our app, which can be redeemed for future travel or converted into other cryptocurrencies.

In addition to seamless payments, our app offers a range of features designed to enhance your travel experience. You can easily search and compare flights, hotels, and other travel arrangements, and book them directly through our app. You can also access real-time information about your travel itinerary, including flight delays, gate changes, and more.

METRIP (SOCIAL MEDIA)

Our app also includes a built-in social platform that allows you to connect with other travelers and share your experiences. You can join groups based on your interests, create and share itineraries, and get recommendations from other travelers.

At MeTrip , we are committed to providing our users with a cutting-edge travel experience that combines the latest technology with exceptional service. We invite you to download our app and start exploring the world in a new and exciting way.

ACHIEVE THE BEST HASHRATE

metgain blockchain is a cryptocurrency mining application designed to be a highly secure platform design for future miners. Start mining and achieve the highest level of Hashrate.

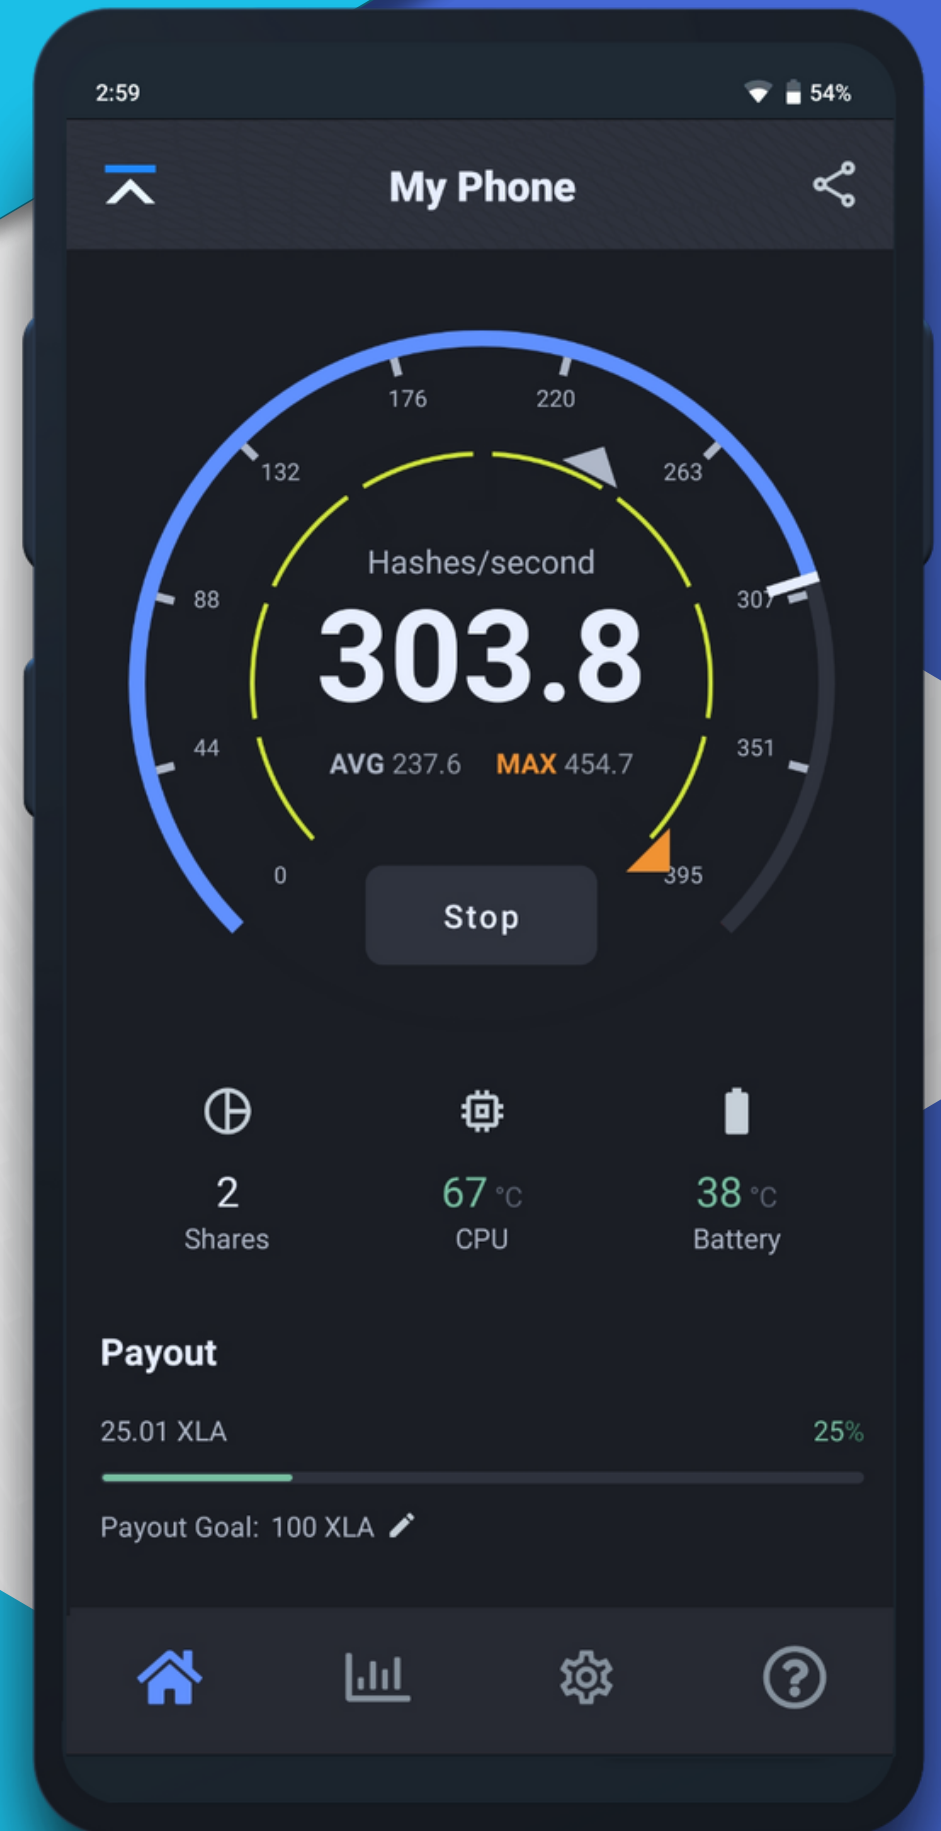

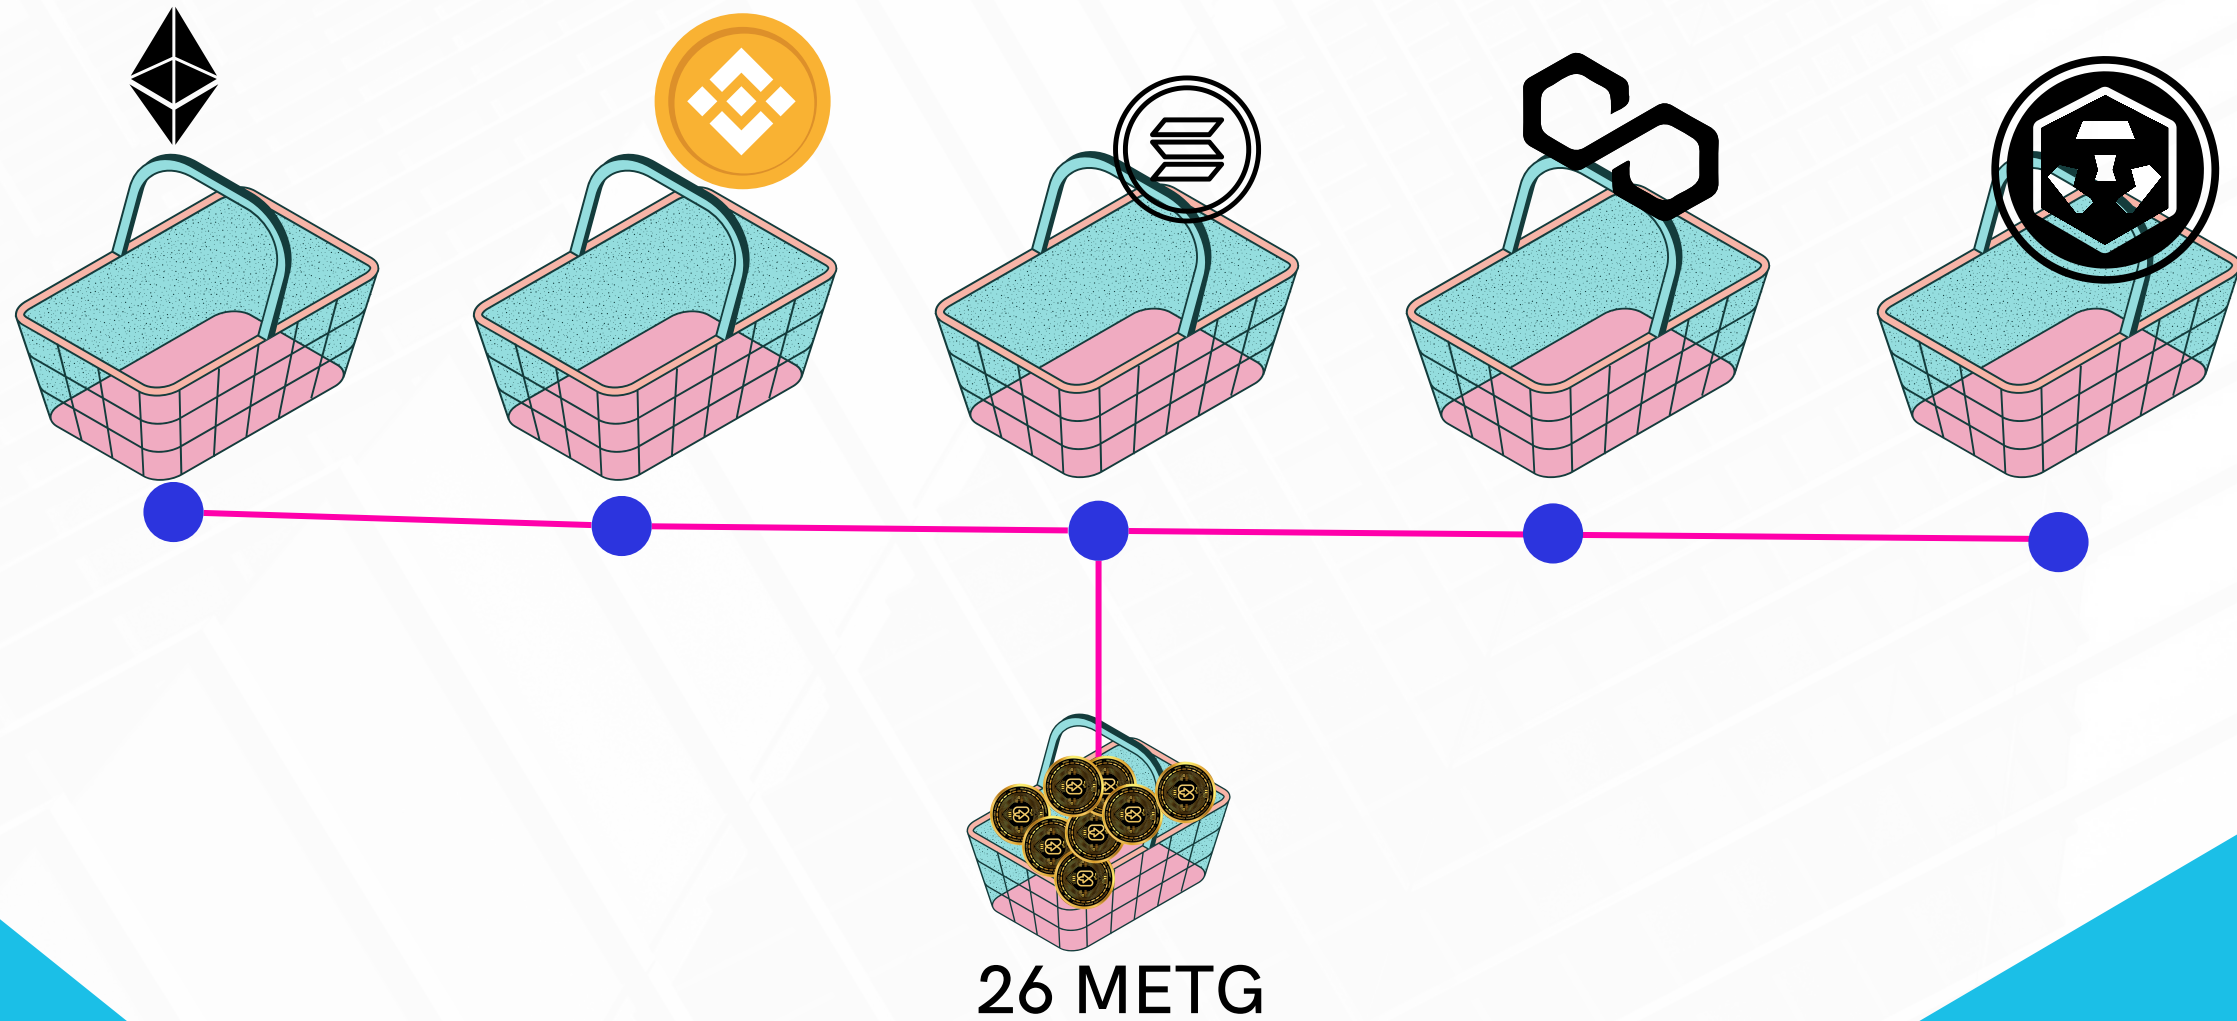

Cryptocurrency mining is a process of creating new digital "coins." However, that is as far as simplicity goes. The process of recovering these coins requires solving complex puzzles, validating cryptocurrency transactions on a blockchain network and adding them to a distributed ledger to locate them.

MET CHAIN (BLOCKCHAIN MAINNET SERVER)

Smart Contract

The project is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third party inference.

Transparency

Users or developers have the opportunity to modify it as they see fit. this makes blockchain a particularly secure technology.

Reduced Transaction Costs

Blockchain allows peer- to-peer and business-to-business transation to be completed without the need for a third party. it means they can actually reduce costs to the user or businesses over time.

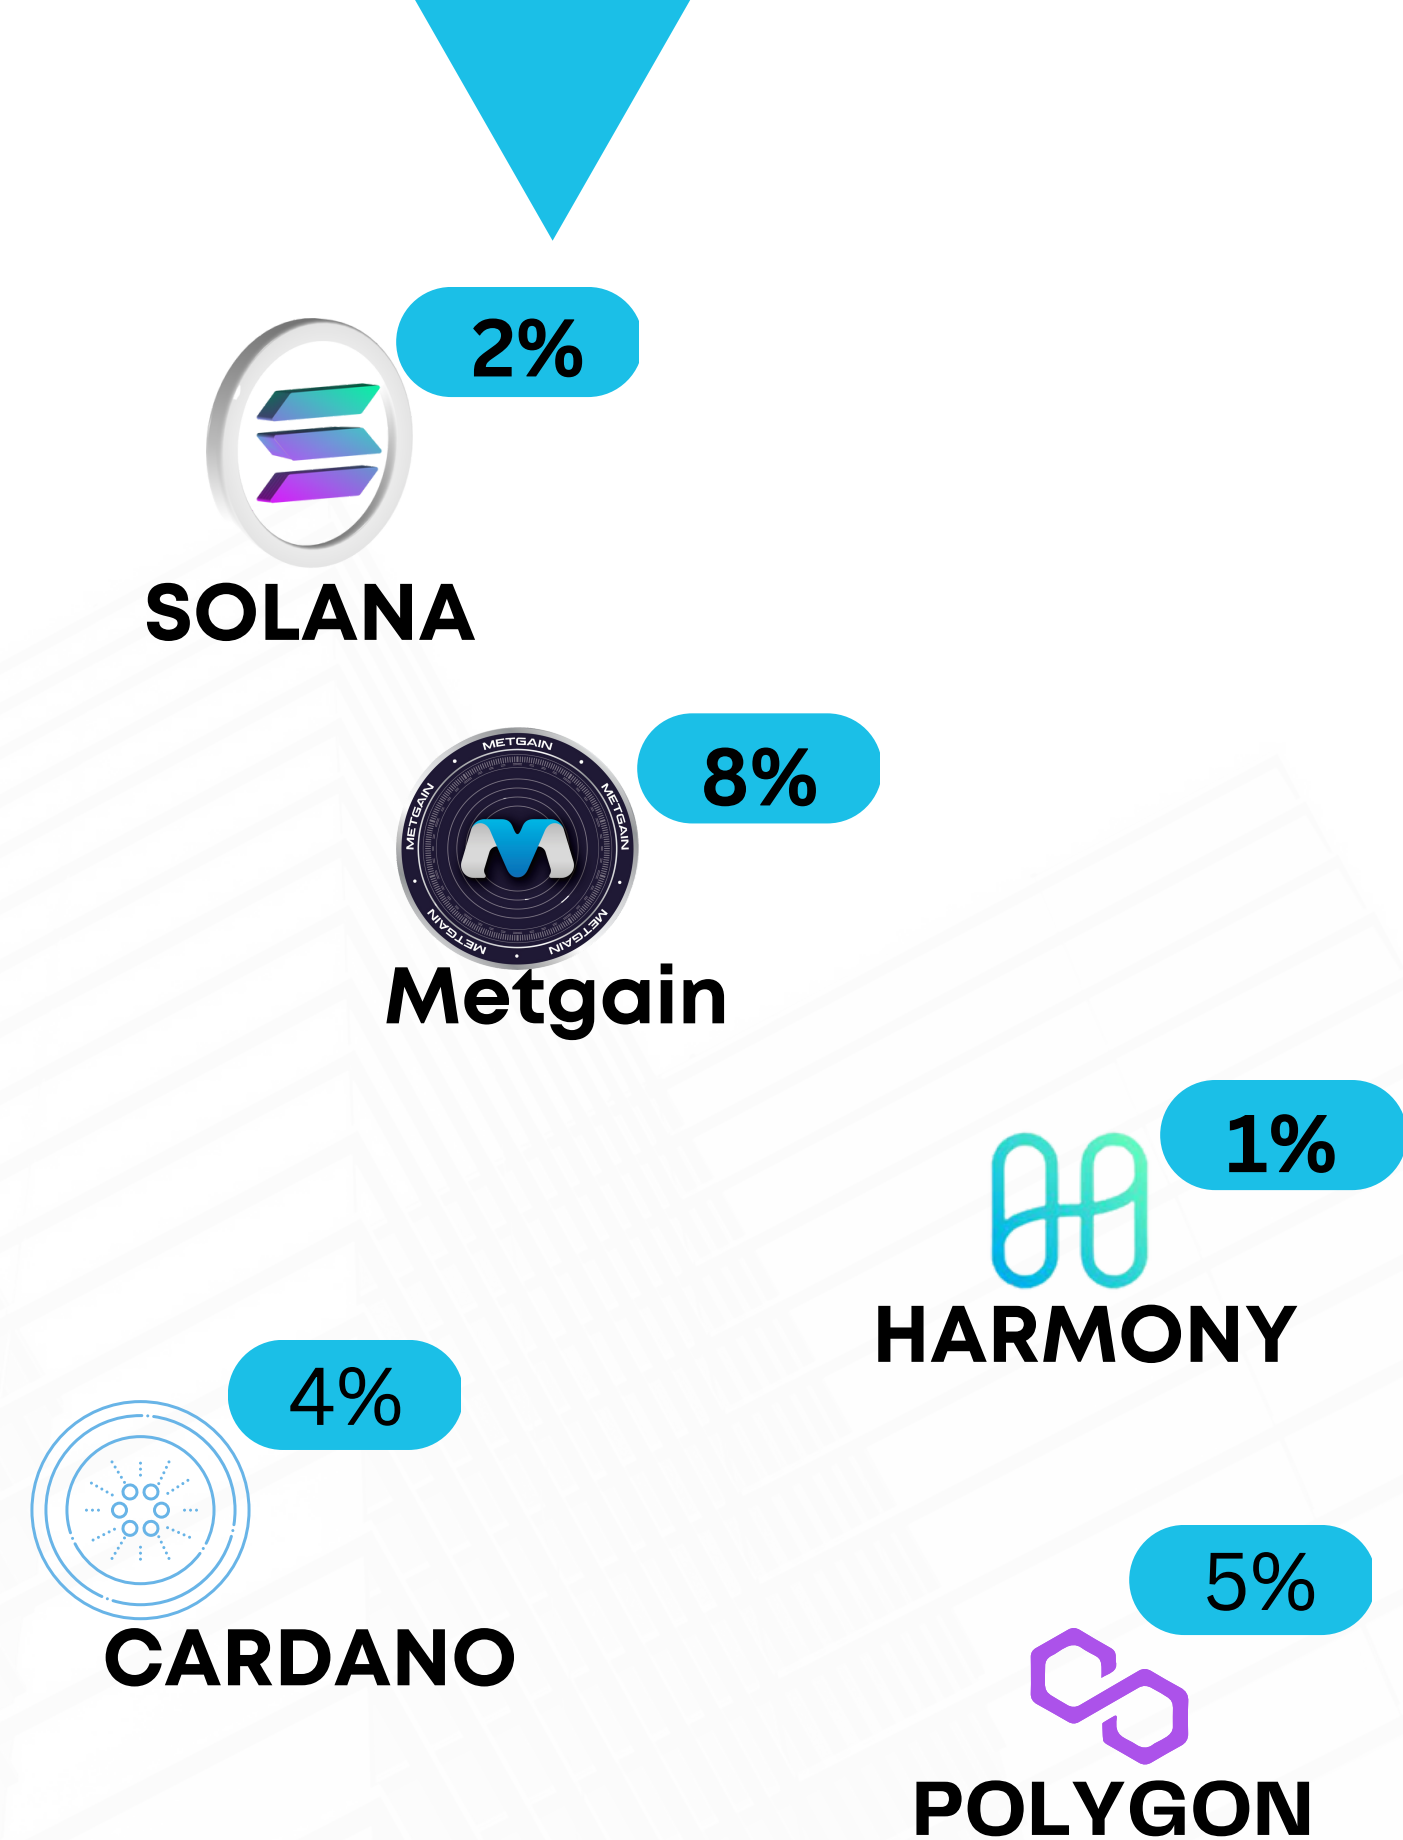

Metgain will become the most DECENTRALIZED LAYER-1 Blockchain.

What is Validator ?

VALIDATOR is a special type of NODE which is confirming all transaction on the blockchain.

VALIDATOR are earning transaction fees in metgain Ecosystem.

VALIDATOR Requirements: 5000 \$ METG
